

THE CHAMPION CHRONICLE

VOLUME 2

CHAMPION, (Alberta) THURSDAY, DEC. 16, 1920

NUMBER 20

ESTABLISHED 1872

NOW that the grain shipments have started, there are a number of transactions to be taken care of for you. The Bank of Hamilton is particularly well equipped to look after all this detail in a thoroughly efficient manner.

BANK OF HAMILTON

Champion Branch, W. K. Anderson, Manager.

Insurance!

Fire, Life, Automobile and Accident.

Farm Loans & Conveyancing

We are at your service in all the above Departments and solicit your business.

FARMERS—Investigate a Confederation Life policy combining Protection and Investment in an unique way. It costs nothing to inquire. See H. Cooper, Agent.

Smith Bros., Mark & Cooper.

Champion Meat Market

T. GILL & SONS, PROPRIETORS

Our stocks of Fresh and Cured Meats have never been more satisfactory nor have our facilities for filling orders, large or small, ever been better.

We assure you of Satisfaction.

Re-Opened

The Champion Garage (UNDER NEW MANAGEMENT)

General Automobile & Tractor Repair Work
Heated Storage and Battery Service.

We respectfully solicit your patronage.

J. FISHER E. APPLEBY

Your friends will appreciate fully as much as a weekly letter.

Only \$1.50 a Year.

Christmas Tree Entertainment

A Christmas tree and entertainment under the joint auspices of the day and Sunday schools will be held in Mark's Hall on Wednesday evening, December 22nd. With Mr. Sweet and Rev. J. W. Oliver in charge of the preparations the public will anticipate something unusually good from this joint entertainment and The Chronicle has no hesitation in assuring everyone concerned that this is an occasion that must not be missed. The regrets over such a contingency would be too long standing to be endured. Make a mental note that you have a binding engagement for the evening of the 22nd.

Curling Club Is On the Job

The curling club has amassed a membership of forty-eight and a splendid season's curling is in prospect. Rapid progress has been made in putting ice on the rink and active operations will be on in a few days. The rink is undoubtedly one of the best in the country towns of the province, and with everything else satisfactory the Champion Curling Club should be heard from the winter.

Express Rate Hearing Over

The express rate enquiry is concluded and the decision of the railway commission may be looked for at any time. It is to be hoped for his own sake that Mr. Carvell has used a little bit better judgement on this occasion than in the rail way case.

Correspondence

That Machine Gun.

Editor Chronicle:
Dear Sir—Taking into consideration the likely shortage of farm labor during the coming season do you not think the present location of the machine gun is a little dangerous, to say the least. With his knowledge of military tactics if the manager of the institution where it is located was to get the gun into action almost the first thing he would hit would be one or two of the most promising or our future farm help. Since Milt Moffatt has overhauled this savage weapon the danger is much more evident and I believe will appeal to your readers as it does to me.

Yours truly, FARMER.

A Desirable Calendar.

Watson & Co. are distributing a handsome little calendar, a copy of which we acknowledge with thanks. While the artist has depicted a landscape slightly different from our own locality, which is naturally the loveliest on earth, it is still a thing of beauty and a joy forever, and would inspire a desire for an extra piece of real estate in the most disengaged breast.

Now that the Calgary elections are over there should be a general easing up in the money markets and a general stabilization of trade in this part of the west. These elections are very demoralizing.

Masquerade Ball December 29th

The Curling Club are sponsors for a masquerade dance to be held in Mark's hall on Wednesday evening, Dec. 29th. There has been considerable demand for a dance of this kind and from the number who have already signified their intention of taking part in this function a big time may be confidently looked forward to. Special music is being secured, lunch will be served in the hall and everything possible done to assure a splendid evening's enjoyment for those who attend. Those desiring to secure costumes for the occasion should consult A. S. Roberts, who is in touch with the best opportunities in this line.

Pump House Was Burned

While the boys interested in the skating rink were busy flooding on Thursday afternoon last week, oil, etc., in the vicinity of the engine took fire either from an open exhaust or through backfiring of the engine, and the pump shed was burned to the ground, the fire also ruining the gasoline engine and seriously injuring the well pump and pump jack. So quick was the shed in flames that the boys lost some of their clothes in the fire. Steps were at once taken to repair the damage and by Saturday a new shed was practically complete, and a new engine installed. There will be practically no delay in getting owing to the prompt action in repairing the well outfit.

Long Beach Isn't In It

Too much cannot be said in favor of the weather we have had this fall and early winter. Anything more favorable or enjoyable is hard to imagine, and many of those who are leaving for the winter are very liable to go further and fare worse.

Fire in the city of Cork, Ireland, following the ambushing of a military lorry, destroyed \$15,000,000 worth of property in the centre of the city. When extremists can't do somebody else harm they never hesitate to turn on themselves in order to keep the ball rolling, and there is little doubt the fires were set by the Sinn Feiners themselves.

J. T. Stephenson is issuing a handsome calendar to his customers. The illustration is entitled "Pure and Sweet" and in connection with the grocery business will be found suggestive. Don't miss getting one of these.

H. W. Wood does not agree with Messrs. Crerar and Drury in regard to taking in anyone who wishes to support the policy advocated by the farmers and widening out the movement. The group feature appeals to Mr. Wood.

One \$62.75 Fur Overcoat reduced to \$40.50 at A. S. Roberts' Christmas Sale.

Twenty-five per cent. off all Men's Pants at A. S. Roberts' Christmas Sale.

If there is anything in this list you require we can save you money.

THE QUEEN'S HOTEL

TORONTO

American Plan, \$4.00 and up; with bath, \$4.50; European Plan, \$2.00 and up.

One of the largest and most comfortable hotels in the Dominion, recently completed. Over 400 rooms, 120 en suite with bath; long distance telephone in every room; elegantly furnished throughout; cuisine and service of the highest order; all the conveniences of a modern hotel; and shopping districts.

HENRY WINNETT.

Ownership of Natural Resources

When the British Crown Colonies of Upper and Lower Canada (as Ontario and Quebec as we know them today), and Nova Scotia were New Brunswick united to form the Dominion of Canada, they were autonomous units enjoying ownership of their public domain and control of their natural resources and with the exception of the fisheries, which the Canadian confederation had agreed to surrender to the Federal authority controlled and jurisdiction over the Customs, Post Office and certain other public services, but they insisted on retaining ownership and control of the public domain, that is, the lands, forests and mines.

Later, when the Crown Colony of British Columbia decided to join the Dominion, it insisted on retaining ownership and control of its public domain and natural resources. It also bargained that certain things should be done, as, for example, that a transcontinental railway should be built connecting British Columbia with the Eastern Provinces.

The construction of this railway across what is now Eastern Canada, but which then was the property of the Canadian Pacific Railway, led to the partition of Canada into two large provinces. In course of time and with increasing settlement it was decided to create the Province of Manitoba out of a portion of this western territory. In entering the Dominion confederation as a Province, Manitoba came in as the creation of the Dominion Parliament, not as a previously established Crown Colony like the other Provinces. It had no Custos Rotulorum privileges to sell land, nor did it at any time exercise such a right in its own behalf. Consequently, in creating Manitoba a Province the Dominion Parliament did not provide that it should give full ownership and control of its natural resources. It should keep what it had hitherto owned. And when Alberta and Saskatchewan were created Provinces in 1905, the same policy was followed.

In justification of the retention of the last rights of the Dominion Parliament in the retain ownership of these natural resources, but the practically unanimous opinion of the West is that by so doing Parliament violated the spirit of the Confederation Act and ignored the cardinal principle upon which Confederation rests. The Canadian confederation is supposed to be a union, or federation, of Provinces each enjoying equal rights, powers, responsibilities and privileges; in a word, all are supposed to be equal. Provinces own and control their natural resources and Provinces own and control their natural resources are denied such ownership and control and the revenues from the natural resources within their bounds go into the Dominion treasury to be shared equally by all Provinces, there is rank inequality. Provinces owning their resources not only obtain all the resultant revenues, but they also get a share from the resources of the other Provinces who do not enjoy such ownership.

In justification for the policy of Dominion retention of ownership and control of the natural resources of the West it was urged that it was in the national interests that these lands should be disposed of as free homesteads and that inasmuch as the encouragement of immigration was a Federal responsibility, the best way to do this was to let the Dominion Parliament control of the homestead lands should be vested in the same authority. It was argued that if the Provinces owned the lands they would be compelled to administer them for revenue producing purposes rather than to encourage settlement.

Furthermore, it was contended, the Dominion Parliament was spending large sums of money annually for immigration purposes solely for the purpose of settling the vacant lands of the West, but that no such service was maintained to add population to the East.

Whatever force there may have been in these arguments at the time, it has all been dissipated now, and has been for some years past. The immigration service of the Dominion Government is exerting itself just as much to attract the West to the West as the Provinces to the East, but it is to bring settlers to the Western which do not own their lands. Free homestead lands are now practically a thing of the past, and control of the lands remaining, the forest and the mines, is not necessary to the success of the Federal immigration policy.

Furthermore, the Dominion today is administering the natural resources of the West for revenue-producing purposes, and the Federal treasury is being depleted of revenue from the sale of these resources, and from the export of the natural resources of the West.

The net result is that there is not equality in status among the Provinces East and West, and as a consequence there is a weakness in the bond of confederation. The Western Provinces are restricted in their revenues, their development is retarded, and an unprogressive, foolish and even dangerous feeling of resentment is aroused in the West against the East because of the injustice under which the West feels it labors.

Worth of Fish Hatcheries

Huge Quantity of Fry is Distributed in Canadian Lakes.

Fish hatcheries operated by the fisheries branch, Department of Marine and Fisheries, Ottawa, have distributed in 1920 three-quarters of a billion fry, in the various provinces throughout the Dominion. The largest distribution of one species was the lake whitefish, of which more than 400,000,000 were released. About half of these were distributed in the Great Lakes and the lakes in Manitoba. Pickerel came second to whitefish, with 100,000,000 distributed. In the Great Lakes and 25,000,000 in Manitoba. Sockeye salmon, the most valuable of all the Pacific species, came third, with 9,000,000.

Minard's Liniment for Garter in Cows.

Tricky.
"I simply can't understand the conduct of my wife's clothes."

"What's the trouble?"

"Well, when she wants to hide anything, she peeks it down her neck, but when she wants to get it again, it's always in her stocking."

A Nasty Crop.

It's easy to plant a mortgage on a farm, but it isn't so easy to raise it.

The most obstinate corns fall to *Halloway's Corn Remover*. Try it.

The Cunes are truly devotees to cleanliness. Public baths abound, and the poorest citizens bathe usually twice a day.

Excellent is Profitable

It Pays the Farmer Every Time to Improve the Quality of His Stock.

Has it paid the farmer to invest in high-priced beef stock? Undoubtedly. Has it paid him to invest in the best quality of land, seed and implements? Undoubtedly. Has it paid him to raise the best wood, hay and feed? Undoubtedly. Has it paid him to raise the best fruit, and do the best in farming and dairying generally? Undoubtedly.

We see it in the improved quality of the best quality of land, seed and implements. We see it in the best quality of wood, hay and feed. We see it in the best fruit, and do the best in farming and dairying generally?

Who cannot tell what they think about anything until they see what the papers have to say about it.

Peasants Rich to Fame.

The peasant, once the symbol of all that was cheap, has risen in the world and is now clashing among the aristocrats in rags.

It is the principal product of twelve of the United States, and in 1919 the peanut crop reached the record proportions of \$3,000,000 bushels, and represented a value of \$10,000,000.

A White Blasted.

A blasted wheat chaffage which is completely white except a jet black head, makes its home in one of the London parks, says a London correspondent. It is invariably alone, as if its color debarred it from mixing with its feathered fellows.

Punishment for Profligates.

The anti-profligating campaign in England has resulted in the conviction of 1,200 persons, with sentences ranging from 10 days to 12 months. Many of these were handed prison terms and \$5,000 in fines collected.

Absence of horns on Aberdeen Angus and Galloway cattle is due entirely to selective breeding.

Fireproof barrels, made from sugar mill refuse, have been invented.

Newspoint Prices Are Still Rising

An Increase of over 243 Per Cent. Since 1916.

Newspoint prices for the Winnipeg newspapers for the first six months of 1921 have been announced by the paper company which supplies this market.

The price quoted is 7 cents a pound, or \$14.00 a ton.

This is an increase of \$4.00 per ton, or 40 per cent. over the price paid for newspaper during the last six months of 1920.

It is an increase of 75 per cent. over the corresponding price for the first six months of 1920.

The increase of \$4.00 a ton now announced is alone greater than the total price paid by the Winnipeg publishers for newspaper as recently as May, 1916.

The price is fair, the mill, and to it the freight rate must be added. The freight rates paid by the Winnipeg publishers for newspaper in 1916 were \$1.50 a ton, as against \$1.00 a ton paid four years ago. This will make a total cost laid down of \$15.50, as against \$6.40 in 1916, an increase of \$13.10—or over 243 per cent.

Bolshevists Have Coat-of-Arms

Symbols Used Represent Industry, Intellect and the Peasantry.

The Bolsheviks have adopted a coat of arms, the joint work. It is said, of Lenin and Trotsky. It consists of a hammer and a sickle, a red star, a circle. Inside the circle the sun is shining on a field representing Humanity. In the foreground are a hammer, a symbol of industry; a sickle, signifying intellect; and a shield, which stands for the peasant.

Between the ends of the shield is a black bird, encircled by a paper band, on which is printed a red slogan. On the shield, which to the Bolsheviks is a symbol of the working class, is the legend: "If I am broken my contents will still live all over the world." The higher point of the lozenge represents Idealism, Intellectuality, Liberty and Love, and the lower, Power, of Life, Labor and the Peasant.

Surrounding the shield is a border of the words "For the Liberation of All Humanity." The hammer and sickle are the symbols of the working class.

A Graceful tribute has been paid by the Bolsheviks to the memory of Lenin in his appointment to be an honorary general in the Canadian militia. Lord Byng proved himself to be a great soldier when he led the Canadians in the historic drive at Vimy Ridge in April and May, 1917.

BLED TO DEATH

Tried to trim a warty rascal, and the warty rascal only care was "Putman's," which removes warts, corns, callouses in one application. Putman's Corn and Wart Extraction, 15¢ the best, 25¢ all others.

Recognize Them?

There are people who fail because they are afraid to make a beginning.

Who are too honest to steal, but will borrow and never pay back.

Who go to bed tired because they spend the day in looking for a easy place.

Who play a tune on one string, but it never makes anybody want to dance.

Who would like to reform the world, but have a front gate that won't shut, stay.

Who cannot tell what they think about anything until they see what the papers have to say about it.

Peasants Rich to Fame.

The peasant, once the symbol of all that was cheap, has risen in the world and is now clashing among the aristocrats in rags.

It is the principal product of twelve of the United States, and in 1919 the peanut crop reached the record proportions of \$3,000,000 bushels, and represented a value of \$10,000,000.

A White Blasted.

Growth of Creameries And Butter Exports In Western Provinces

As late as 1914, Manitoba was a large importer of creamery butter, the province's imports of creamery butter for the year, named being 29,553 carloads. In 1912 it had been as high as 55 carloads imported. Thence in 1915 the province began to export butter, and the total sent has increased, rapidly from year to year. Last year Manitoba exported 153 carloads.

This change of position from the importer to the exporter, so far as butter is concerned, has been gradually altering some very fundamental things in connection with butter manufacture, and the truth is that, with the public taste dictating it in any decided way, the Manitoba factories have changed the nature of their operations almost completely during the past few years.

A few years ago the creamery butter was much nearer in character to dairy butter than it is now, says the *Montreal Family Herald*. Then, a great deal of butter was gathered and churned, the idea being held by many parents of the factories that more butter could be made from 100 pounds of cream if it was not soured by the time it was compared with the creamery butter. This butter was creamed without pasteurization, and the butter was thereby salted. This gave a high flavored butter—a butter with decided flavor in its unsalted state, and then with the particular tang which the salt itself contributed.

Joys of Rural Life

Community Work Means the Development of a Rural Purpose

There is much of adventure in hunting hills, and woods and prairie for hidden treasures in the way of rare flowers, insects, animals, birds, and studying their ways; the thrill of the ways of common life, the ways of a community man can even be started, and a knowledge of our own district must lead on to the desire to extend our knowledge to other fields.

The more interested-in-society and its work around us, will be developed an increased interest in humanity and its ways. The different races of our country, their languages, and history will excite a desire to know and understand them—another study for the teacher. The more these interests would lead to an increase in the feeling of community responsibility and a real citizenship.

Interest in community work means the development of a spirit of helpfulness in life. This means awakened intelligence, it means the birth of the co-operative spirit; it means the only means by which civilization can progress upwards; it means Christianity in action. To develop it in the young people needs organization, needs help. The young people are ready for it; it's up to the people to provide it.

The boys and girls are responsive enough, given the right lead, but this must come principally in the rural districts, from the teacher, the parents and the schools. The schools are rapidly waking up, but their work will be infinitely delayed if the parents maintain the attitude of indifference so often met with to-day—Mrs. W. H. Parry, President, U. F. W., of Alberta.

Green Is Nature's Color.

Green is a restful color. Occultists say that of all colors green is the most friendly to the optic nerve. In lands where eternal snows or eternal white sands dash up the sky, green is the color to make them green or go blind. But green grass never bothers the eye. One can stare a forest in the face all day with impunity. Nature's greens never get on our nerves.

The Silver King.

To buy a silver mine at a sheriff's sale for \$200, the property being sold to pay wages due the purchaser and then to sell the mine a few years afterwards for \$75,000 has been the good fortune of the Salina of Alice Arm, British Columbia, who just died, composed of the Esperance mine to a group of Vancouver men.

World's Smallest Coin.

The coin of the realm, or even a cent, is to be had for a cent," so-called, as the widow of the Bible contributed the poor. Its shape was hexagonal, and its value about one-fiftieth of a cent. It would take five thousand miles to make one dollar.

Hogs and Bacon Will be Scarce

Certain That Hog and Bacon Prices Will Remain High.

Some farmers have been quick to grasp the lesson for 1921 in the sharp decline lately in the number of breeding sows. A canvass of hog breeding in Ontario in the last two weeks shows that this tide in your back to replenish the supplies on farms has not for many years been more active than this fall. One well-known breeder in Ontario states he is almost out of sows. The true reason for the knowledge of the Canadian hog-breeder attributes this to the fact that farmers have come to understand that there is "more money" for the meat which can be bred for litter next spring.

As the awakening has to go further, in some sections of the Prairie Provinces the drop was as much as 60 to 75 per cent., compared with two years ago. In the Eastern Provinces the drop was as much as 40 per cent. and so far as previous opinion has been found that salt has been over-rated as a butter preservative; that in many cases it was hiding the change in flavor which marked the change in condition of the butter, rather than actually preserving the butter from spoiling. The fact is that the packaging, particularly all the creameries of Western Canada—certainly all the clearing creameries—are now making a most sweet cream butter, and this is the standard butter and this butter can be put into storage and taken out again twelve months afterward very little changed—an ideal export butter.

While it is easy enough to tell of this change, it needs very strenuous work to bring it about.

Buit Fair Paris

Disclosure of Camouflouge to Deceive German Air Raiders.

It is the secret of the secret plan of a "Fake Paris" built about fifteen miles outside the city limits to attract German Goths during their night raids, thus preserving the real Paris from their肆虐.

Thousands of wooden huts, miles of canvas and a series of railroad stations, trains and factory sites were created which imitated to perfection the real ones.

The Eastern railway station, for instance, was constructed at about ten miles north of the city, with its buildings, trains, signals, and a factory nearly apparently going at full blast.

To stimulate a station, wooden caravans were covered by transparent canvas. Lit from below the effect was that of huge vaulted domes like the real railroad stations. When the Goths were signaled the lights were lowered suddenly to make it seem as if the station had been hit by a bomb.

For more than two miles beyond the fictitious stations were fictitious trains composed of a series of wooden pants, the size of the usual railroad cars, covered with transparent ground. To hold sides of the panels in a border of light which from above, seemed like the reflection from lighted windows. Special electrical arrangement made it appear, at times, as if the trains were moving, to transport a fake "heart of Paris," the Saint Germain forest, some fifteen miles away, while about twelve miles to the west, a huge factory town was to have been simulated.

The atmosphere had been created by the use of these plants, and

Mr. Jacquot, the inventor of the ingenious "town camouflaging system" is now looking for a place with other air raids to be able to perfect his ideas.

Friendly Intercourse Again

German Professors Are Willing to Extend the Olive Branch.

German university professors and members of the church have drawn up a report in the capital to the effect that "friendly intercourse" which existed before the war, which the professors and doctors of Oxford University recently addressed to professors of arts and sciences and members of universities and learned societies of Canada, has been re-established.

"Science knows but one aim—the search after truth—and it requires for the performance of this task the common labor of all, regardless of national boundaries," say the German professors, who are interested in this joint labor and disavowed many personalities. We are ready to resume these connections and by common labor to relegate to oblivion everything offensive, spoken or written, in both camps."

Prominent Railway Official

MR. S. J. HUNGERFORD

Receives New Appointment

Now Vice-President in Charge of Operation of C. R. Railways.

Samuel J. Hungerford, who has been appointed Vice-President in charge of Operation and Maintenance of Canadian National Railways, is of the type of man, young and energetic, who has been sought for some time. Born in Bedford in Quebec, in 1872, he was engaged 48 last July, but he has been engaged in the business of the "rolling wheel" for 34 years.

As a boy of 14, at Farriham, Quebec, he was employed in a sawmill with a railway locomotive.

The great harvest of feed grain now available will largely be disposed of at a loss if not fed to livestock. Prices for hogs today compare more favorably with the price of grain than ever before, and the demand exceeds the marketing.

Canadian overseas markets demand steady supply if

they are not to be lost.

In no line of livestock is the supply so far down as in hogs, and consequently bacon prices will remain comparatively high next year. Whatever is done to restore supplies must be done quickly. The breeding season for pigs begins in the first week of August, and only about the middle of December. If the opportunity is allowed to slip the recovery in numbers will be so retarded that our present feed stocks will be still more expensive.

Mr. Hungerford is a man of quiet action who never lets his words exceed his acts. He has a wide circle of friends in the rail road world, and he is known to be a man of great influence.

He is a man of great energy, and he has made his mark in the rail road world.

He is a man of great influence.

THURSDAY, Dec. 18, 1923.

The Weed Problem.

Practically everyone in this district will welcome the initiation of a campaign against the weeds which threaten to destroy all hope of the immediate future from the farmer's standpoint. While the movement inaugurated is far from radical it is still a move in the right direction and may be taken for an indication of a more vigorous campaign during the coming summer, as everyone must realize that nothing but the most vigorous efforts on the part of everyone concerned may hope to contend successfully with the present situation.

The facility with which Russian thistles and mustard are transferred from one farm to another by the wind makes this weed problem one in which every farmer in the district is very seriously concerned. It is of little use for one man to keep his farm free from weeds if his neighbor does not follow suit, as weeds easily spread down the whole country for miles in every direction. Consequently this becomes a matter for the council who must make it their business to see that one shuffles farmer does not by his indifference jeopardize the interests of his neighbors for miles in every direction from his holdings.

Between stubble in crop and damage done by cut worms, the areas covered by weeds with grain intermixed this summer were so extensive that it seemed impossible to make any successful campaign against the weeds without inflicting losses on individuals beyond endurance, and as almost every farm in the district was more or less involved in the situation the magnitude of the necessary operations was appalling and presented any general attempt at eradication as being impractical. With the reaping of this crop, however, the council and the community at large must realize that only the most strenuous efforts on the part of all will prevent this weed invasion from becoming a calamity, much greater than drought or hail.

Whether it appeals to the individuals composing the councils or not in Harmony and adjoining districts these bodies will be forced by public opinion to take active measures against the further depredations of Russian thistles and mustard, and the certainty that this will be the case should have a widespread effect on the character of farming operations during 1921. The farmer who deliberately seeds lands which it is a foregone conclusion will be overrun with noxious weeds will have no one to blame but himself when he is ordered to plow the weeds and crop down. The most fatuous optimist must realize by this time that the future of this section of the country is seriously jeopardized and that if unheeded measures would be taken worse than none at all. Any movement against the weeds would be greatly accelerated by good crop years, but even with this help unceasing work must be kept up against them if ultimate results are to be obtained.

The utility of the common sweep or bull rake is well

ing and bunching the weeds under present weather conditions has been drawn to general attention by the council and is well worthy of adoption by everyone who has any land covered by a growth which will interfere with plowing or other cultivation. Where this method has been put in operation the very best of results have been attained, as the weeds burn freely after being bunched. With weather like the present prevailing there is no reason why every field and road in the municipal district should not be cleaned up thoroughly, as both time and horse power are easily available. A great many farmers have made considerable progress in cleaning up the weeds on their farms, but none of the methods in use have in any way equalled the bulk in effectiveness, and this implement is easily made at a small cost.

The appearance of the country is so disgraceful with fences and roads almost obliterated in many instances with weeds, that anyone owning land here is vitally interested in assisting every move that is made to better conditions. Anything like a general move against present appearances and conditions will inevitably meet with success, but a continuance of the practical indifference on the part of a large section of the residents will insure disaster for the future.

Proceedings are to be taken against United States manufacturers of farm implements for combining in restraint of trade. It is claimed excessive profits have been made in consequence of the combination to fix prices. Present prices here would indicate robbery of the worst kind in this line.

Local & General

Seven more shopping days.
Mr. and Mrs. F. L. Roberts visited Calgary last week.

John Waggonhurst has rented his farm to P. J. Larkin, and will spend the winter at coast points.

E. Sison, late of Brant, has taken charge of the barber's department at the Central Billiard Parlours.

W. E. Anderson is in charge of the milk wagon at present. Mr. Goodbright being laid up with the grippe.

Legislation to prohibit immigration to the United States for a period of one year has been introduced at Washington.

A persistent effort is being made to have the British embargo against Canadian cattle lifted, but as yet without much signs of success.

The Ladies' Aid of Champion wishes anyone having quilt patches to leave them at Mrs. McLean's, at the sub-division, for the first meeting in January.

Mr. and Mrs. C. H. Sutton are spending the winter at Long Beach, Cal., and report the weather and other conditions magnificent and in every way enjoyable.

Jos. Clemens, who left for Calgary on Monday, will be missed here as a curler of experience, who was depended upon to help uphold the honors gleamed by the local club.

Small holders of Victory Bonds should not be stampeded into selling them because of changes in market prices. The temporary withdrawal of government support of the market has affected prices, but the bonds have lost none of their value or attractiveness as an investment, and the price is sure to become stabilized—Calgary Herald.

Sugar refiners are still looking for help from the government.

Found—Motor car number plate 18886. Owner apply at Chronicle office.

The war cost the United States \$24,000,000,000, according to the secretary of the treasury.

James A. Goodwin left last week for Lewiston, Idaho, where he will spend the winter.

L. J. Adams has rented his residence to Robt. Tyler, and leaves in a few days for Long Beach, Cal.

"Mr. and Mrs. L. N. Warren and two boys, left during the week for Anderson, Missouri, where they will spend the winter months.

In response to many inquiries it is a pleasure to state that the artist who so cleverly portrayed the chariari held here was John Anderson.

A letter from L. W. Boden who is now at Victoria, B. C. indicates that the change from Alberta conditions is very appreciable. Flowers are in bloom and every sign of summer on every hand. Mr. and Mrs. Boden are evidently enjoying themselves.

Ole Running has purchased the Central Billiard Parlour from J. Clemens taking possession on Monday morning.

The deal involved the transfer to Mr. Clemens of the running residence and considerable cash.

The new proprietor of the Central is an old resident here and should prove a success in his new vocation.

So many of our good and desirable citizens have left, and are leaving the community that the editor has used up all the nice things he ever learned to say about people. If some reprobate would go somewhere, though he might get a real send off. There are a few of that kind of adjectives not quite worn out.

Equinox on Dec. 21st.

F. J. Clipp and Wm. Fields were in Calgary last week, returning home on Saturday morning, bringing home a Ford car for Mr. Fields.

John Klein received a letter from Russia recently which indicates extreme conditions there. Practically no food was available, while fuel was

practically an unknown quantity, everything possible having been burned. In order to make a coffin it was necessary to tear off part of the roof of a house, no other material being available, and this in a part of the country where the supply of timber was supposed to be inexhaustible.

Our composition, by the inadvertent loss of the letter "a" made Mr. J. Archibald Worthy Patron of the Eastern Star Lodge in last week's issue. It is such an unusual thing to find a "Mr." anybody creating much stir around here that the error will be easily understood, and it is hoped, will be forgiven by those concerned. Patron is still masculine regardless of who votes, and in consequence the Worthy Patron is Mr. J. Archibald.

The Family Herald and Weekly Star

The Family Herald and Weekly Star of Montreal has announced that after December 31st, 1929 the subscription price of that great weekly will be \$2.00 per year in Canada, England, Ireland, or Scotland, and \$2.50 in the United States. The present heavy increase in the cost of white paper make the slight advance necessary, in fact it is only a small portion of the increased cost over previous years. All new and subscriptions, the publishers say, mailed before December 31st, 1929, will be accepted at the old rate of \$1.50. Even at the advanced price of \$2.00 per year, The Family Herald is regarded as the best value on the Continent. It is acknowledged as being absolutely without a rival, hence its enormous circulation.

ABOLISH FINANCIAL WORRY PROLONG YOUR LIFE

A CANADIAN GOVERNMENT ANNUITY WILL DO IT

Gives a larger return for life than is obtainable from any other form of investment with absolute security.

Free from Dominion Income Tax. Any premium received from the Canadian Government for a sum of money, or for a series of 5 annual purchases, to begin at once, or at any later date desired, in an amount of from \$500 to \$5,000, to be paid in monthly or quarterly instalments.

Slaves to a Select Diet

BY LORETTA C. LYNCH
An Acknowledged Expert in All Matters Pertaining to Household Management.

I have had a visitor, a boy of twelve. Dear boy, too. The kind of a boy who can do little things for you and whistle and fly kites and be generally good—until it comes to eating. And this boy's diet is so limited that it is hard work to cook for him.

Sick? Not a bit of it. But the poor boy has been permitted to grow up with a taste for a few of the more expensive foods. And no wonder how nasty may be some of the cheaper dishes how attractive you prepare them, the boy is polite but quite firm in his refusal to touch as they are.

As a result, the youth生长 slow because there are so many more of him. And the boy and girl of his kind is grown up, the boarder who picks the boarding house charging a fair board and then grumble because so many things are served that are not.

And the boy grown is the unhappy traveler who, because he cannot get the few foods he knew at home, derides the land of milk and honey. Sometimes this boy, grown, expects steaks and chops from his wife daily when he provided only a beef stew last night. And the boy and girl of his kind who feels abused when he receives wholesome meals well planned from a dietetic standpoint and properly prepared taste only now and then give little of the few foods to which they are entitled.

One of the first bits of advice is, do not let this sort of thing happen. No child likes new foods always the first time these are presented to him. And the same is true of grown-ups. But the question is, who would use the word "new" to a boy? And, of course, will make an effort to introduce at least one new dish a week into the diet. Make half the diet a special small serving, more conducive to liking than a larger portion.

There are some housewives who think that a meal without potatoes is really not a meal. Yet these same women are often surprised to find that their families welcome steamed rice with carefully prepared tomato sauce when perchance they are dining out.

My little sister did not come for me to discipline in the way of what was good for him to eat. And, of course, courtesy dictated that I try to please him. But we ate one streak-chopped ham, one bread butter, peas, corn, and a few rich desserts. There was no green vegetable, or in fact any vegetable, other than peas and corn that he would eat. And, too, eggs and cereals and milks he had no liking for, although he would take milk in coffee or a rich dessert.

Yet had he not been a guest, he had been trained for a few weeks. I feel sure that through starvation he could have been induced to eat a golden apple, or an Invasion baked apple or the like, fat raisins and other delicious fruits.

And when he became hungry enough I feel sure he would have eaten a slice of bread, but he would not eat the bacon and boiled ham, or the bacon and the Braxton Kerr trophy, the winning the best milling oats in Canada.

Minard's Liniment For Diptera.

Scott Farmers Anxious to Come. Rev. J. Knos Clark, immigration chaplain, Winnipeg, advised the Winnipeg Presbyterians that there is such an easy entry into Canada for underprivileged immigrants that the church leaders, Sentinels, however, are making great transportation for the coming summer into Canada. He declared that he had heard there were 15,000 Scott farmers ready to leave for Canada at once but that they had to defer their departure on account of shortage of shipping accommodation.

Senouff in Manchuria. General Senouff, leader of the anti-Bolshevik forces along the frontier between Siberia and Manchuria, has arrived in Port Arthur. Manchuria, and it is expected he will find asylum. Gen. Senouff gave up the struggle against the Bolsheviks when his men, defeated by the Soviet forces, deserted in great numbers.

Growth of the Livestock Industry

Tolmie Praises Work of Cleaning Up Mange Areas on the Prairies.

Hon. Dr. S. P. Tolmie, Minister of Agriculture, in an address at a complimentary banquet given to him by 150 employees of the federal department of agriculture in Ontario, spoke highly of the work done by the employees of his department.

Speaking of the importance and responsibility of protecting the health of the livestock of Canada, he estimated the total value of the livestock at \$1,000,000,000.

Great credit was given the employees in the department who had succeeded in cleaning up the mange areas in Southern Alberta and Saskatchewan during the past summer.

British Columbia was also on sale in England when he departed by Dr. Tolmie, who said efforts were being made to have the control removed.

Tests on Alberta Coal

Government Industrial Research Council to Conduct Experiments.

Alberta coal tests covering a wide range of scientific investigation and research will be undertaken by the government industrial research council and its university research branch, and to make preliminary arrangements for the work. Edgar Stensfeld, who has been secured as chemical engineer for the government, is now in Edmonton. Just when the experiments are to begin has not yet been decided, but Mr. Stensfeld is discussing the matter with the government and university authorities with a view to the arranging for the installation of the necessary plant and testing apparatus and to determine the precise nature of the work to be undertaken.

Cataract Cannot be Cured

by LOCAL APPLICATIONS.

Dr. Tolmie, who has been testing the effects of various cataract treatments, has now reached the conclusion that the only way to cure cataract is to remove the lens.

Repatriation by Germany.

To British eyes Germany can make repatriation on a large scale only if she is aided, and even then the cost will be high.

Germany, to be sure, has a large foreign commerce.

It may be a future default if Germany is unable to pay its debts.

Germany has a large foreign debt.

USE SLOAN'S TO WARD OFF PAIN

You can just tell by its healthy stimulus that it is doing good to do you good.

"I only had some Sloan's Liniment," said a woman who had come to the office of Dr. Tolmie, "and I am now in

perfect health again."

"I am sure you are a good

doctor," said the woman.

"I am," said Dr. Tolmie.

"I am sure you are a good

doctor," said the woman.

"I am," said Dr. Tolmie.

Dealing in Habit Forming Drugs

Federal Officials Assisted by R.C.M.P. Prosecute Vigorous War Against Offenders.

The war against illicit drugs in Canada is being waged vigorously by officials of the federal department of health, working in co-operation with the Royal Canadian Mounted Police, but it is stated that this is only a section of the Dominion which is won in some measure to the use of these drugs.

It is a section of the Dominion which makes our men often pale, saddle up, and ride circles under the eyes of the public.

It is a section of the Dominion which makes our men often pale, saddle up, and ride circles under the eyes of the public.

WEEDS!

The Council of this Municipal District, working for the best interests of the ratepayers, wishes to warn everyone that unless the menace of weeds is combatted at once your investment and the labor of years will be wasted.

Our next years programme must include a more strict enforcement of the Weeds Act for the benefit of everyone concerned.

You are asked to co-operate with us this month (if the weather permits) in having your fields and the road allowance adjoining your land cleaned up as best you can.

A cheap and effective implement may be devised by constructing an old-fashioned Bull Rake or Sweep. This will loosen the weeds and leave them in a compact pile which is easily burned.

Those wishing details as to the construction of this rake may obtain same at the Secretary-Treasurer's office in Champion.

Early in February a Demonstration Train will visit Champion and the best means of combatting weeds and the ravages of cut worms will be discussed by experts. You are particularly urged not to miss this meeting. The exact date will be announced shortly.

Your Future Prospects Rest on Keeping Your Fields Clean

The above is a copy of a circular letter issued to the ratepayers of Harmony Municipal District by the council, and may be interpreted as a warning to prepare for active operations against noxious weeds in future.

Following is a brief description of a weed puller as manufactured by H. E. Smith, and which, can in operation by members of the council impressed them as unquestionably as serviceable an implement for the purpose as would be possible.

The teeth of the rake were made from 2x4's, 12 feet long, sharpened from the top side, leaving the bottoms straight. These were placed about two feet apart, a piece 4x6x22 fastened in the centre across the teeth. The teeth were further supported by two pieces of 2x3 placed about 10 inches on each side of the centre piece, the interval being filled by an inch board, thus providing a platform for the operators to stand on. A team at each end provides the motive power, the ropes or chains being fastened to the ends of the big cross piece, and the tool is unhooked by simply turning the team around.

Mr. Smith's rake could not be better, but it is quite possible a smaller one would do the same work at a slower rate, so long as sufficient weight was carried.

Local & General

Tie a string around your finger to remind you of the Curling Club Masquerade Ball on Wednesday evening, Dec 29th.

Miss Helen Woodhull, who has been seriously ill is making rapid progress towards recovery.

Weather conditions in Southern Alberta are so fine that those who are going to coast points for the winter must not expect anything to compare with the home brew.

The death occurred at Calgary on Tuesday, December 14th, of Mary Ellen Schneidke, wife of Henry Schneidke, of Champion. The funeral takes place here on Friday.

The Albertan subscription contest in which Mrs. F. Sisson is one of the leading candidates closes on Saturday night. See that your subscription reaches Mrs. Sisson before that time.

The citizens of Calgary are inclined to scrap the matter out with the gas company, the vote on Wednesday showing conclusively they are opposed to any raise in the price of gas at the present time.

WATER

Delivered anywhere in town for 40c per Barrel.

E. PALMER

Good positions at good pay are waiting for you. In a short time and after a period of training makes you competitive. Get your training and the right start to a successful career. Apply to the Garbutt Business College, Calgary.

"An Institution of High Ideals"

Letters and inquiries will be handled by the best use of your natural talents under our guidance.

Mr. and Mrs. B. Hummel

returned from a visit to Rumsey and Calgary this week.

Moffatt's Hardware has a Christmas tree on exhibition which at night is the centre of a fine electrical display.

Preparations for Christmas have become general during the week and the window display is tempting to say the least. The merchants deserve credit for the effort they have made to keep up the traditional spirit of the season.

The finest present for boys or girls is the Chautauqua Desk which includes a greater degree of usefulness with its acceptability than any other article on the market. See H. J. Meyer, at the Ford Garage, for a demonstration.

It's an ill wind that blows nobody good, and even sickness can't spoil a jolly pie, chocolate cake, raisin bread, nor dunk wine, allows the rest of the family to live high while the neighbors send the good things along. By the way there are some lovely cooks in this vicinity.

If 100 subscriptions to The Chronicle were paid before Christmas it would be a Merry Christmas indeed for the publisher. The amount of one subscription is small, but a large number of small amounts make a fair sized roll. The Chronicle has maintained the \$1.50 price while most other weeklies, not all of them better by any means, have raised the subscription price to \$2.00 per year. If you feel it within your means try and boost our Christmas for us. We really need the money.

CHRONICLE "WANT" ADS

Advertisements under this heading not exceeding one inch, 50 cents for first insertion, 35 cents for each subsequent insertion.

Found

A purse containing money and a manicure article.

One man's coat on road east of Champion—Apply to J. N. Beaupre.
